

Cloud Development, 2021 fall. Lab1

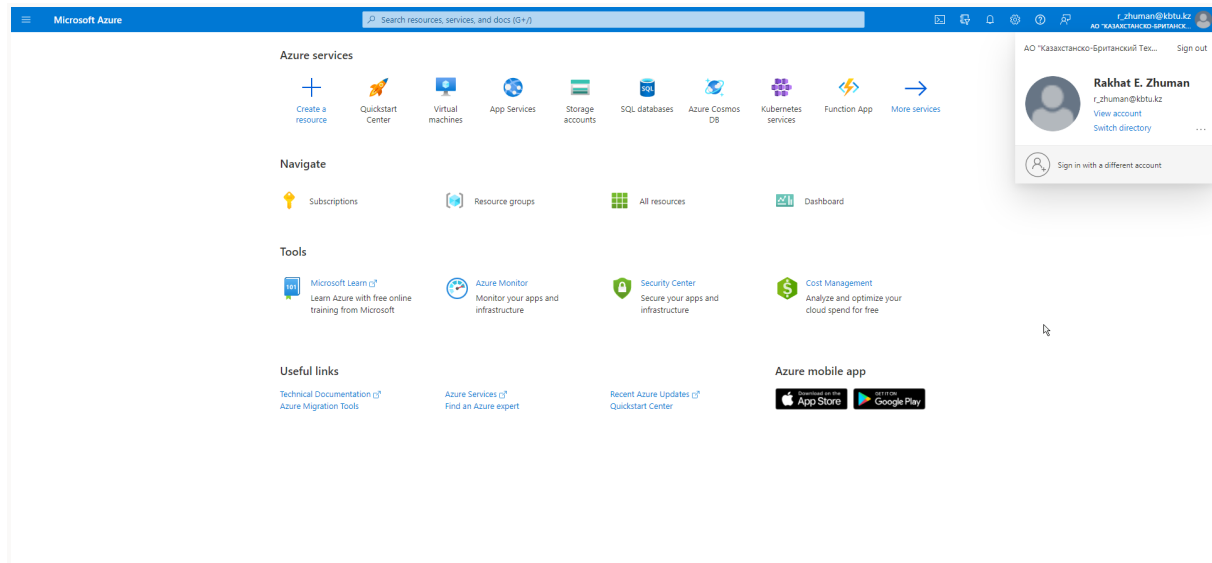

Report

made by Zhuman Rakhat

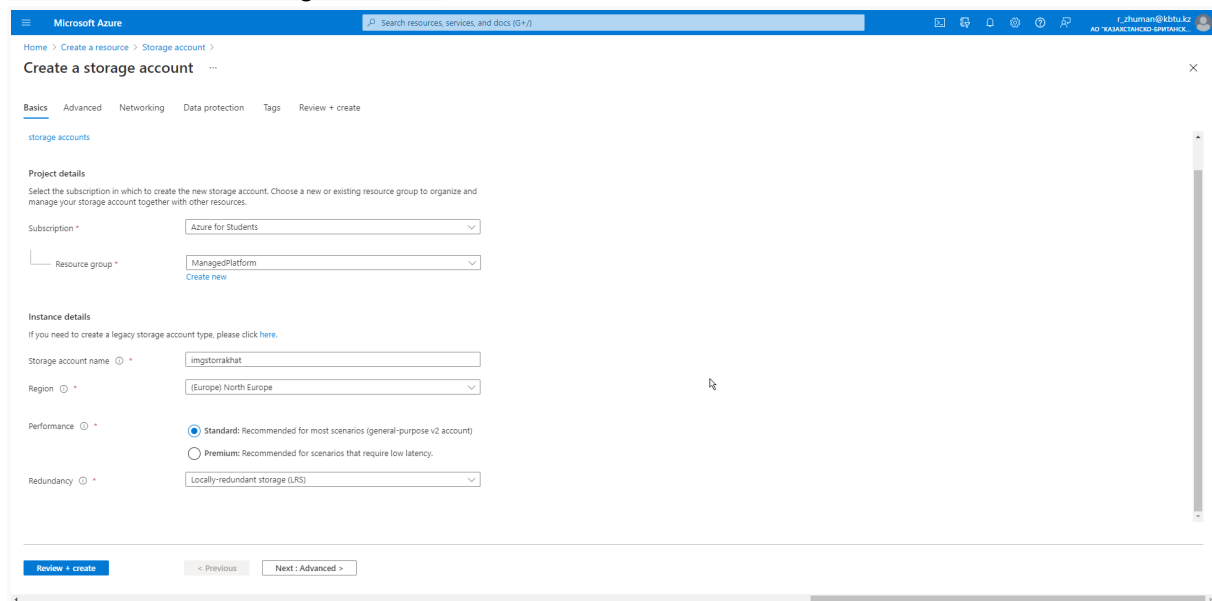

Almaty 2021

Exercise 1: Build a back-end API by using Azure Storage and the Web Apps feature of Azure App Service

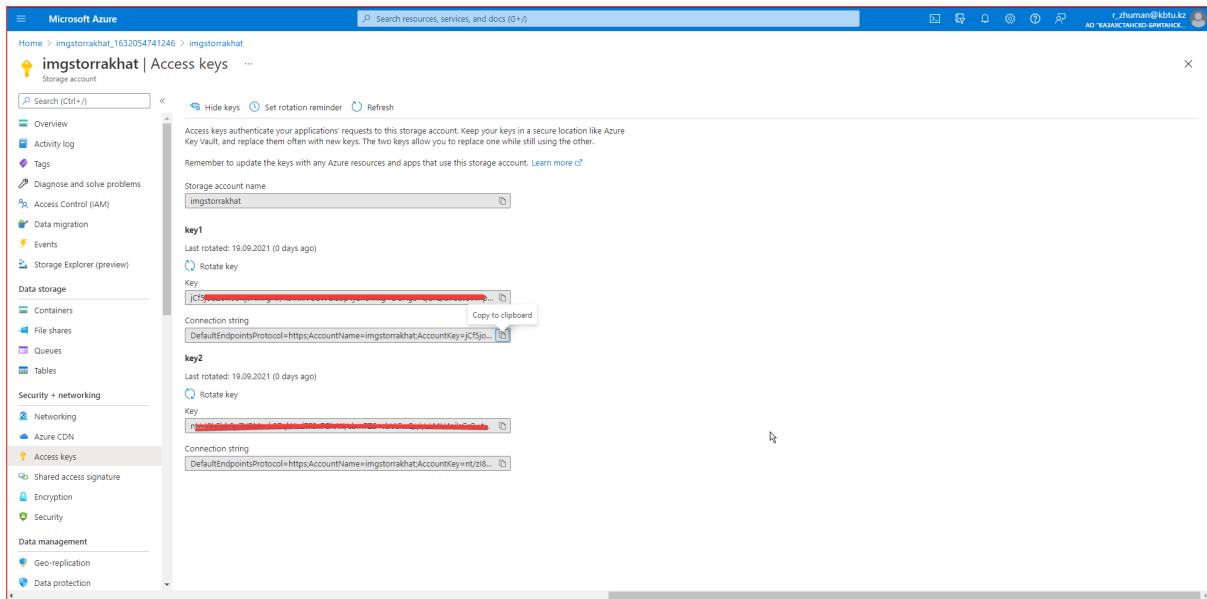

Task 1: Open the Azure portal

Task 2: Create a Storage account

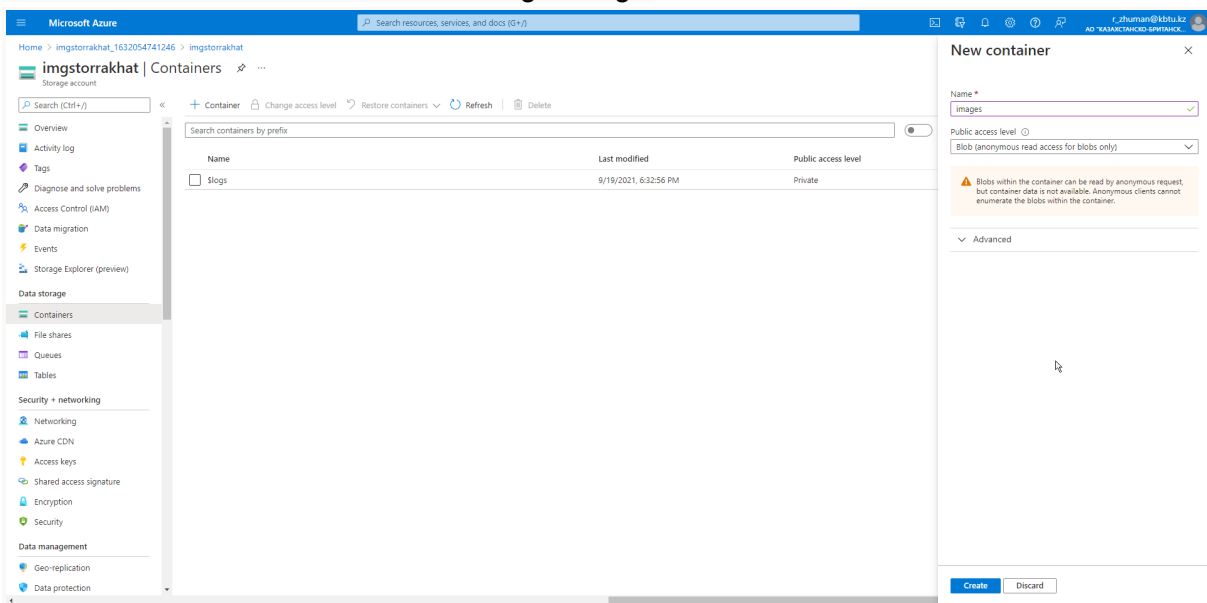

Record the value of the Connection string text box. You'll use this value later in this lab.

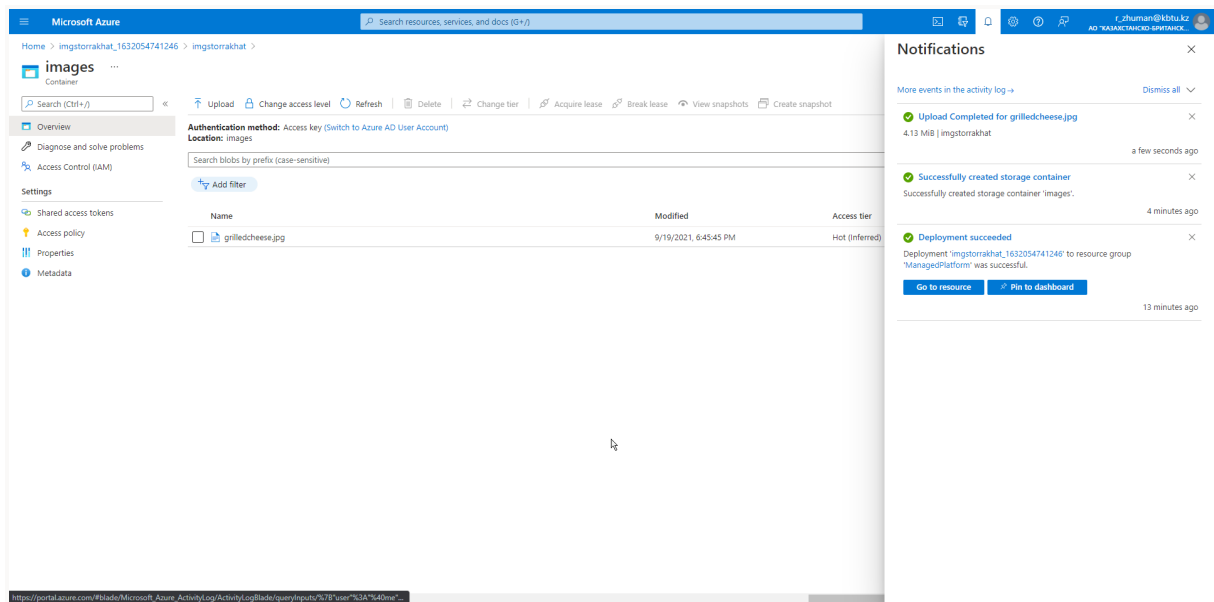

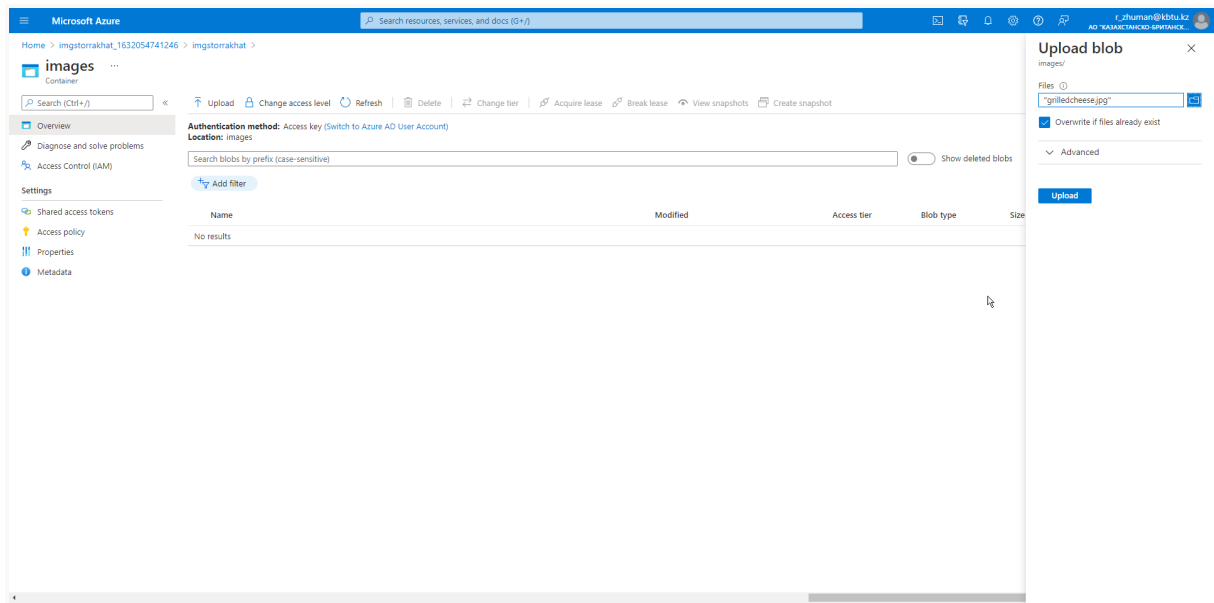

Task 3: Upload a sample blob

Create a new container with the following settings:

Go to the new images container, and then use the Upload button to upload the grilledcheese.jpg file in the Labs\01\Starter\Imagesfolder, downloaded from Teams group.

Task 4: Create a web app

Microsoft Azure

Search resources, services, and docs (G+)

Home > Create a resource >

Create Web App

Select a subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.
